Forecast for Saturday 21 Oct 2023

Weather: A cloudy day with widespread rain, sleet and snow. Snow will fall down to 800 metres, with a risk of blizzard like conditions on the higher summits in the morning. Snow will increasingly turn to rain at all levels by early afternoon as warmer air arrives from the southeast. Some heavy rain is expected in the afternoon for a time. Turning drier from the south later in the afternoon and through the evening.

Chance of cloud-free hill tops above 800m: 30%, best chance later in the afternoon and evening in the south

Low Cloud and visibility: Widely poor in extensive low cloud down to 450 to 700 metres, highest cloud bases west of the A9. Whiteout conditions expected in snow for a time. Low cloud may clear from the south of the region from late afternoon onwards.

Met Office Aberdeen Meteorologist's View

Be prepared for wintertime conditions in the morning with snow, poor visibility and severe wind chill. Very strong winds will lead to a risk of being blown over, and winds across the higher southern Cairngorms may reach storm force again. Icy surfaces can be expected at height. Burns at lower elevations will be in full spate and access roads may be flooded.

Forecast for Sunday 22 Oct 2023

Weather: A much drier and less windy day with cloud breaking to leave brighter skies by afternoon. Some rain around first thing otherwise mostly dry with just a passing light shower in the afternoon.

Maximum wind: Westerly 20 mph

Chance of cloud-free hill tops above 800m: 70%, best chance in the afternoon

Low Cloud and visibility: Areas of cloud down to 600 metres at first, this clearing away northeast through the morning to leave very good visibility with only small amounts of cloud above 750 metres by afternoon

Temperature: **Glens:** Plus 3 rising to 8 Celsius
At 800m: Plus 5 Celsius
Freezing level: 1200 to 1500 metres
